

# ERIN BILLMAN

**Executive Director,  
Science Based Targets Network**

Erin Billman has led the Science Based Targets Network since its launch in 2020, building it into a leading authority on credible corporate action for a nature positive future. Under her leadership, SBTN has gained significant momentum; the first companies have set science-based targets for nature, and over 160 are preparing to do so.

With over 20 years of experience in conservation and consulting, Erin has developed environmental strategies for NGOs, corporations, and industry alliances via roles at Blu Skye, Tompkins Conservation, and Bain & Company. She holds an MBA in sustainable business and the environment from Wharton.

Erin is on the board of Earthwatch Institute, chair of the World Benchmarking Alliance's Expert Review Committee for its corporate nature benchmark, member of GEO Atlas's Steering Board, and a member of the Core Stewardship Group of the Nature Positive Initiative to promote the integrity and implementation of the Global Goal for Nature.
